WHAT WE DO

Ashiana works within the national contract to support clients to access their entitlements as potential victims of trafficking. Empowering them to resolve problems and develop life skills through the provision of safety planning, support work and advocacy. Working alongside partner agencies, we develop relationships to further the support available to our client group.

ABOUT YOU

You will have substantial experience of providing support to vulnerable people including casework experience with trauma victims. An understanding of human trafficking and modern slavery and its impact, as well as having a commitment to the values of the organisation.
